

**The Quality of Your Drinking
Water Isn't One of the Most
Important Issues You Need
To Consider ...**

It's the Only Issue !

Why REPCO?

Experience is the primary reason to choose REPCO and one of its authorized dealers. We have a solid reputation for providing homeowners and industry with time proven solutions to difficult water quality problems. Each REPCO Conditioner is professionally designed for years of high performance.

It Begins with a Water Test

This is the first important step you can make. Run your cold water until clear for a fresh sample from the source. A true sample is critical for the best final result.

Analyze the Results

Our experienced licensed engineers meticulously review the results of your water test. This assures a properly engineered and designed system that corrects any quality problems you may have

Water Softener and Stain Remover

Soft water washing make clothes cleaner, last longer and feel softer. Hair and skin will feel smoother and have more luster. You will save money for cleaning products because cleaning products will lather better and last longer. Dishes and glassware will rinse sparkling clear and clean. Water lines and fixtures will not build up and restrict flow.

REPCO water softeners also remove the unsightly red rust stains of iron and the black staining of manganese. This is all done automatically with efficient use of salt. Our units are programmed on a 12-day timer and set to regenerate on the day and time you choose. Metered units are programmed to regenerate on water consumption

For Removal of Hardness and Iron in Solution Up to 5 ppm

MODEL	CAPACITY	MINERAL TYPE	Weight	Peak Flow	Backwash
5R30-2510	30,000 Grains	High Capacity Resin	90	7-12	2.4
5R45-2510	45,000 Grains	High Capacity Resin	120	9-15	2.4
5R60-2510	60,000 Grains	High Capacity Resin	160	14-25	4.0

More Efficient Softening Options

REPCO has state-of-the-art salt saving control valves for water softeners that only regenerate when needed. These models maximize salt savings and water conservation. Whether you want up or down flow brine or even a 24-hour supply of conditioned water, with filtered water cleaning, REPCO water softeners are high performance without the high price

2510/5600 Metered

6600/6700 Computerized

8500/9000 24 hr. Soft Water

Select the Proper System

The next important step is to select the right REPCO system to fit your needs. Our network of authorized dealers will assist you with final product selection, pricing, installation and service.

Enjoy the Results

The most important step is the easiest of all. Simply put, it is to sit back and feel confident that you and your family have entrusted the quality of your drinking water to professionals and that everything is in working order.

Acid Neutralizers

A simple graph shows the effect REPCO acid neutralizers have on pH and Alkalinity (a water buffer measurement) to stop corrosion. Unsightly green/blue stains from corroding piping and fixtures will be eliminated while enjoying the added benefit of sediment filtration down to 20-40 microns. Your REPCO acid neutralizer will work hard for you by simply adding the prescribed neutralizer blend each year or so. This will prevent costly repairs of plumbing as well as general maintenance, adding years to the life of your home.

Model	Mineral Type	Weight	Peak Flow	Backwash
15RA-2510	Neutralizer	160	7	5
20RA-2510		120	12	8

	0.00	0.30	0.60	1.00	2.00	3.00	5.00
IRON (ppm)							
MANGANESE mg/L							

2-motor drive 2510

Acid Neutralizers

Rotten egg sulphur smell and iron/manganese stains are oxidized away in the REPCO Iron Filter. Regeneration is automatic, using a conservative amount of potassium permanganate to re-oxidize the filter. Say goodbye to rotten egg odors caused by hydrogen sulfide gas. Eliminate the stains of iron and manganese and enjoy the benefit of sediment filtration down to 20-40 microns.

By-pass valves

Model	Mineral Type	Weight	Peak Flow	Backwash
15RI-2510	Manganese-Greensand	160	7	5
20RI-2510		120	12	8

Water Correction Without the Use of Chemicals

Birm

Birm acts as a catalyst to enhance the reaction of dissolved oxygen with iron and manganese for removal. When water has sufficient dissolved oxygen, a REPCO birm filter is an efficient and economical way of removing iron and manganese. No refrigeration is needed, only periodic backwashing. Savings on salt and potassium permanganate give this conditioner the flair for efficiency.

Multi-Media

Many waters have more problems than iron and manganese alone, such as low pH, turbidity, and sediment. REPCO multi-media filters save the expenses of extra equipment by using a combination of minerals in one filter to remove these problems.

REPCO Aerator and Air Release Package

The REPCO aerator is fully adjustable and is used on waters with low dissolved oxygen and hydrogen sulfide gas. The REPCO air release package accumulates the excess air and releases it through a vent kit. Combine this package with any REPCO filter and you can eliminate iron and manganese staining, rotten eff odors, murky water, chlorine taste and odor, sediment and acid water.
